Product Performance & Customer Insights

Business Insights Report

Executive Summary

This dashboard analyzes product performance, customer satisfaction, category distribution, pricing, and customer engagement.

1. Customer Favourites

Business Insights:

- Tunics and watches show the highest average ratings.
- These categories have stronger customer satisfaction than others.

Recommendations:

- Increase promotion of highly rated categories.
- Analyze what drives positive customer feedback and replicate it.

2. Top 10 Categories

Business Insights:

- T-shirts dominate the product catalog.
- Product offerings are concentrated in a few categories.

Recommendations:

- Maintain inventory in high-demand categories.
- Diversify the catalog by growing promising smaller categories.

3. Most Customer Engagement

Business Insights:

- A few products receive significantly more ratings than others.
- These products attract the highest customer attention.

Recommendations:

- Feature these products in marketing campaigns.
- Use them for cross-selling opportunities.

4. Rating vs Discount Relationship

Business Insights:

- High discounts do not consistently produce higher ratings.
- Product quality matters more than discount levels.

Recommendations:

- Avoid relying solely on discounts.
- Focus on quality improvements and customer experience.

5. Premium Categories by Average Selling Price

Business Insights:

- Watches are the highest-priced category.
- Wallets also represent a premium segment.

Recommendations:

- Develop premium-category campaigns.
- Increase visibility of high-margin products.

6. KPI Insights

Key Metrics:

- Average Rating: 3.62
- Total Categories: 97
- Total Products: 1,000

Recommendations:

- Improve ratings toward 4+.
- Optimize category mix and inventory allocation.

Final Strategic Recommendations

- Invest more in highly rated categories.
- Improve low-rated categories through quality checks.
- Promote premium products to increase profitability.
- Use customer engagement data to drive marketing decisions.
- Focus on value creation instead of excessive discounting.
